Leading in sustainable development
We are recognized for outstanding performance in sustainability.
We consistently excel in sustainability investment indexes (ESG Indexes) and rankings and as a leader in Diversity & Inclusion.

Investing in our communities
We support communities in countries where we live and work.
We hire locally and source most of our products and services in the countries in which they are needed. We also actively support our local communities through charitable contributions and employee volunteerism.

Improving customers’ environmental performance
Our climate change innovation enables more than two times net greenhouse gas benefit from the use of our products by customers.
In 2022, a subset of our products and applications enabled our customers to avoid 90 million metric tons of CO2e – 2.3x more than greenhouse gas emissions of all our operations.

Reducing our carbon footprint in production
We continuously optimize our use of energy and natural resources.
We avoided one million metric tons of CO2e emissions in 2022 by enhancing the energy efficiency of building, processes and the transportation fleet.

Putting safety first
Our goal is zero incidents and no harm to people, communities or the environment.
Safety is a company value and part of our culture. Our lost workday case rate in 2022 was four times better than the most recent Occupational Health and Safety Administration industrial average.

Valuing employee diversity
We are an industry leader in diversity and inclusion.
We embrace diversity and inclusion in order to attract, develop and retain the best talent and build high-performing teams.
